Highlights

Panalpina expands Perishables Network

Panalpina launched the global Perishables Network with a focus on 15 key countries and an ambitious plan to double that number by 2020. The network expanded through acquisitions of four companies specializing in perishables logistics—Air Connection in Kenya, Interfresh in the Netherlands, Cool Chain Group in Germany, and Adelantex and AD Handling in Belgium—strengthening Panalpina's ability to offer complete, end-to-end solutions for customers in both origin and destination countries.

Innovative customer portal is piloted in Air Freight

Panalpina successfully piloted its new, fully automated online quotation and booking platform for ad hoc cargo with selected Air Freight customers. This new centralized digital platform will provide customers with a fast, simple and reliable online interface that enables informed decision-making by giving access to easy and instantaneous quotation and booking of ad hoc shipments globally.

Panalpina introduces Panprojects Carrier solution for heavy-lift cargo

With this new carrier model Panalpina can oversee multimodal heavy-lift moves from fabrication to installation sites under one single contract that clearly governs all modes of transport. For customers like EPC (engineering, procurement and construction) companies and oil and gas majors, this offering with its unique legal framework reduces to an absolute minimum the commercial, technical and contractual risks that are inherent to the multimodal transport of project cargo.

EcoVadis awards Panalpina with gold rating for sustainability

Panalpina received the highest rating from EcoVadis, an independent platform that invites companies to assess the environmental and social performance of their business partners. Panalpina was also recognized as being in the top 1% of those in the industry, and the top 2% of all 30,000 companies being assessed by EcoVadis on corporate social responsibility requirements.

SAP TM implemented in Germany

Germany became the first large country where Panalpina implemented the new transportation management system, SAP TM, which will improve the company's productivity and agility. With this successful rollout in Air and Ocean Freight, Panalpina demonstrated that the system is stable and scalable.

Panalpina strengthens Global Supply Chain Solutions offering

Panalpina centralized its Supply Chain Solutions offering with plans to expand the existing team of experts and further invest in technology and infrastructure. Panalpina's customers from across multiple industries will benefit from solutions that manage their supply chains from end to end and offer greater flexibility, customization, and visibility.
